VISION
EVOLUTIONEUM

Mineralogical Museum

Discover the variety of minerals on the 500 square meters of the Mineralogy Museum. In our museum you will find rare pieces of gold and crystals glittering and sparkling in the showcases. Extraterrestrial objects can also be found in the exhibition. The museum includes a total of 1,500 objects that provide information about the origin of our solar system and the development of the Earth. Marvel at the beauty of rare stones and learn about their use in everyday life, their significance and where they have been found. Varying lectures, events and a diverse educational program for people of all ages complete the museum's offers. Together with this museum, the Zoological Museum and the Geological-Paleontological Museum are part of the Centre of Natural History (CeNak).
